

## CREATING SUSTAINABLE COMMUNITIES

The Company continues to work closely with housing associations and local authorities to provide affordable housing within many of its schemes and, in line with current Government strategy, is creating sustainable communities which can include retirement homes and nursing homes through its Caredays Division.

An excellent demonstration of this, and of the Company's teamwork, is reflected in the success of Summerfields in Wilmslow. This substantial development has three distinct phases. The first, Summerfields, is a completed mixed housing scheme of almost 900 properties. The second, Summerfields Village Centre, comprises offices, shops, supermarket, public house, leisure club, apartments and social housing which, together with Summerfields Village Mews and Summerfields Village Grove, create a further 184 houses. The third element comprises The Villas, Palm Grove, Regent's Gate and Regent's Park taking the total number of properties at this location to almost 1,500.
